

What I should already know : Some names of flowers and plants. They will be able to name some parts of flowers and trees.

Enquiry Questions

- Can we find out what a plant is?
- Can we identify and describe garden plants?
- Can we identify and describe wild plants?
- Can we identify and describe a range of trees?
- Can we identify different parts of a plant?
- Can we make observations of growing plants?

Key Vocabulary

Bark - the covering of the stems of woody plants, like trees. Bark protects the tree.

Berry -fruits that come from a single ovary but have multiple seeds.

Blossom - the flower of a plant which forms a seed or fruit.

Branch - a woody part of a tree or bush that grows out from the trunk.

Bud - a swelling on a plant that can grow into new parts, such as leaves or a flower.

Bulb - is the roundish, tear-shaped part of some plants.

Deciduous Trees - They lose their leaves in the autumn every year. Their leaves are generally broad, flat and have veins running through them.

Evergreen trees - They have green leaves all year round. Their leaves are generally thick, waxy and narrow like needles.

Flower - the part of a plant that is often brightly coloured and grows at the end of the stem.

Fruit - A fruit is the part of a flowering plant that contains the seeds.

Garden Plant - A flower grown especially in a garden.

Leaf/leaves - the part of a tree or plant that

National Curriculum

Pupils will:

Skills and Knowledge

1. Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.
2. Identify and describe the basic structure of common flowering plants, including trees.

Working Scientifically

- WS1)** Asking simple questions and recognising that they can be answered in different ways.
- WS2)** Observing closely, using simple equipment.
- WS3)** Performing simple tests.
- WS4)** Identifying and classifying.
- WS5)** Using their observations and ideas to suggest answers to questions.
- WS6)** Gathering and recording data to help in answering questions.

are flat, thin and usually green.

Petal - A petal is a coloured part of a flower.

Plant - A living thing that usually grows from the ground.

Root - The part of a plant that grows underground.

Seed - The part of a flowering plant that can develop into a new plant.

Stalk - the thin part that joins it to the plant or tree.

Stem - the thin, upright part of a plant on which the flowers and leaves grow.

Structure - a thing made up of a number of parts joined together in a certain way.

Tree - tall, woody plants.

Trunk - the thick main stem of a tree, from which its branches grow.

Wild Plant - A wild plant will grow by itself. It does not need to be cared for.

Vegetables - a part of a plant that is edible
